An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for the examiner's amendment to the claims, abstract and page 29 of the specification was given in a telephone interview with Mark Murphy on August 25, 2005. (The grammatical correction to page 48 was not discussed.)

The application has been amended as follows:

In the specification:

Page 29, line 7: "basophenanthroline" has been changed to --bathophenanthroline-- and "basocuproine" has been changed to --bathocuproine--.

Page 48, line 22: "is" has been changed to --are--.

Application/Control Number: 10/777,519

Art Unit: 1774

The abstract has been amended as follows:

Abstract

An object of the present invention is to provide novel organometal Organometal complexes which is are obtainable with a good yield by using a ligand which can be easily synthesized are provided. Particularly, it is intended to provide the The organometal complexes which is are excellent in heat resistance. Further, it is intended to provide an An electroluminescence element having high light emission efficiency by manufacturing the electroluminescence element is manufactured using the organometal complex. Therefore, the organometal complex represented by the general formula (1) is synthesized. Further, this is applied to the electroluminescence element.

- electroluminescence element comprising the light emission material according to claim 1, wherein an electroluminescence element comprises the light emission material; and wherein the electroluminescence element is incorporated into an electronic appliance is selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, an audio reproduction apparatus, a notebook type personal computer, a game machine, a personal digital assistant and an image reproduction apparatus having a recording medium.
- 21. (Currently Amended) The An electronic appliance comprising an electroluminescence element comprising the light emission material according to claim 14, wherein an electroluminescence element comprises the light emission material; and wherein the electroluminescence element is incorporated into an electronic appliance is selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, an audio reproduction apparatus, a notebook type personal computer, a game machine, a personal digital assistant and an image reproduction apparatus having a recording medium.
- 24. (Currently Amended) The An electronic appliance comprising an electroluminescence element comprising the light emission material according to claim 2,

wherein an electroluminescence element comprises the light emission material; and wherein the electroluminescence element is incorporated into an electronic appliance is selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, an audio reproduction apparatus, a notebook type personal computer, a game machine, a personal digital assistant and an image reproduction apparatus having a recording medium.

- 25. (Currently Amended) The An electronic appliance comprising an electroluminescence element comprising the light emission material according to claim 5, wherein an electroluminescence element comprises the light emission material; and wherein the electroluminescence element is incorporated into an electronic appliance is selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, an audio reproduction apparatus, a notebook type personal computer, a game machine, a personal digital assistant and an image reproduction apparatus having a recording medium.
- 26. (Currently Amended) The An electronic appliance comprising an electroluminescence element comprising the light emission material according to claim 6, wherein an electroluminescence element comprises the light emission material; and wherein the electroluminescence element is incorporated into an electronic appliance is selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, an audio reproduction apparatus, a notebook type personal computer, a game machine, a personal digital assistant and an image reproduction apparatus having a recording medium.

29. (Currently Amended) The An electronic appliance comprising an electroluminescence element comprising the light emission material according to claim 15, wherein an electroluminescence element comprises the light emission material; and wherein the electroluminescence element is incorporated into an electronic appliance is selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, an audio reproduction apparatus, a notebook type personal computer, a game machine, a personal digital assistant and an image reproduction apparatus having a recording medium.
